DRIVE GREEN THIS APRIL – EARTH DAY STARTS WITH YOUR CAR!

APRIL IS EARTH MONTH – KEEP YOUR CAR AND THE PLANET GREEN!

At A&A Automotive, we believe in doing our part to keep the Earth as green as possible. With Earth Day this April 22nd, it's the perfect time to think about how maintaining your vehicle can help reduce emissions, improve fuel efficiency, and lessen your environmental impact.

Here are some key repairs and maintenance services that can make a difference:

- Regular Oil Changes – Fresh, clean oil helps your engine run more efficiently, reducing harmful emissions.
- Tire Maintenance – Properly inflated and aligned tires improve fuel economy and reduce tire waste.
- Air Filter Replacements – A clean air filter allows your engine to breathe better, improving performance and reducing fuel consumption.
- Fuel System Cleaning – Removing carbon buildup increases fuel efficiency and lowers emissions.
- Spark Plug Replacements – Worn-out spark plugs can cause misfires, leading to wasted fuel and higher emissions.
- Exhaust System Checks – Ensuring your catalytic converter and exhaust system are functioning properly helps keep harmful pollutants out of the air.

At A&A Automotive, we're committed to both our customers and the environment. Whether it's a routine check-up or an eco-friendly repair, we're here to help keep your car running efficiently while reducing your carbon footprint.

"I've found my new shop. Great service, super professional but also had a dog chilling in the corner, totally my vibe. The best part is that they're right next door. I was dreading the bill I was about to receive but alas, it wasn't too bad considering the Sausalito/Marin tax. The most important thing is that my ride or die is more ride and less die now. Thanks A&A."
